

43-SRTB1-24-LM

Wiring diagram

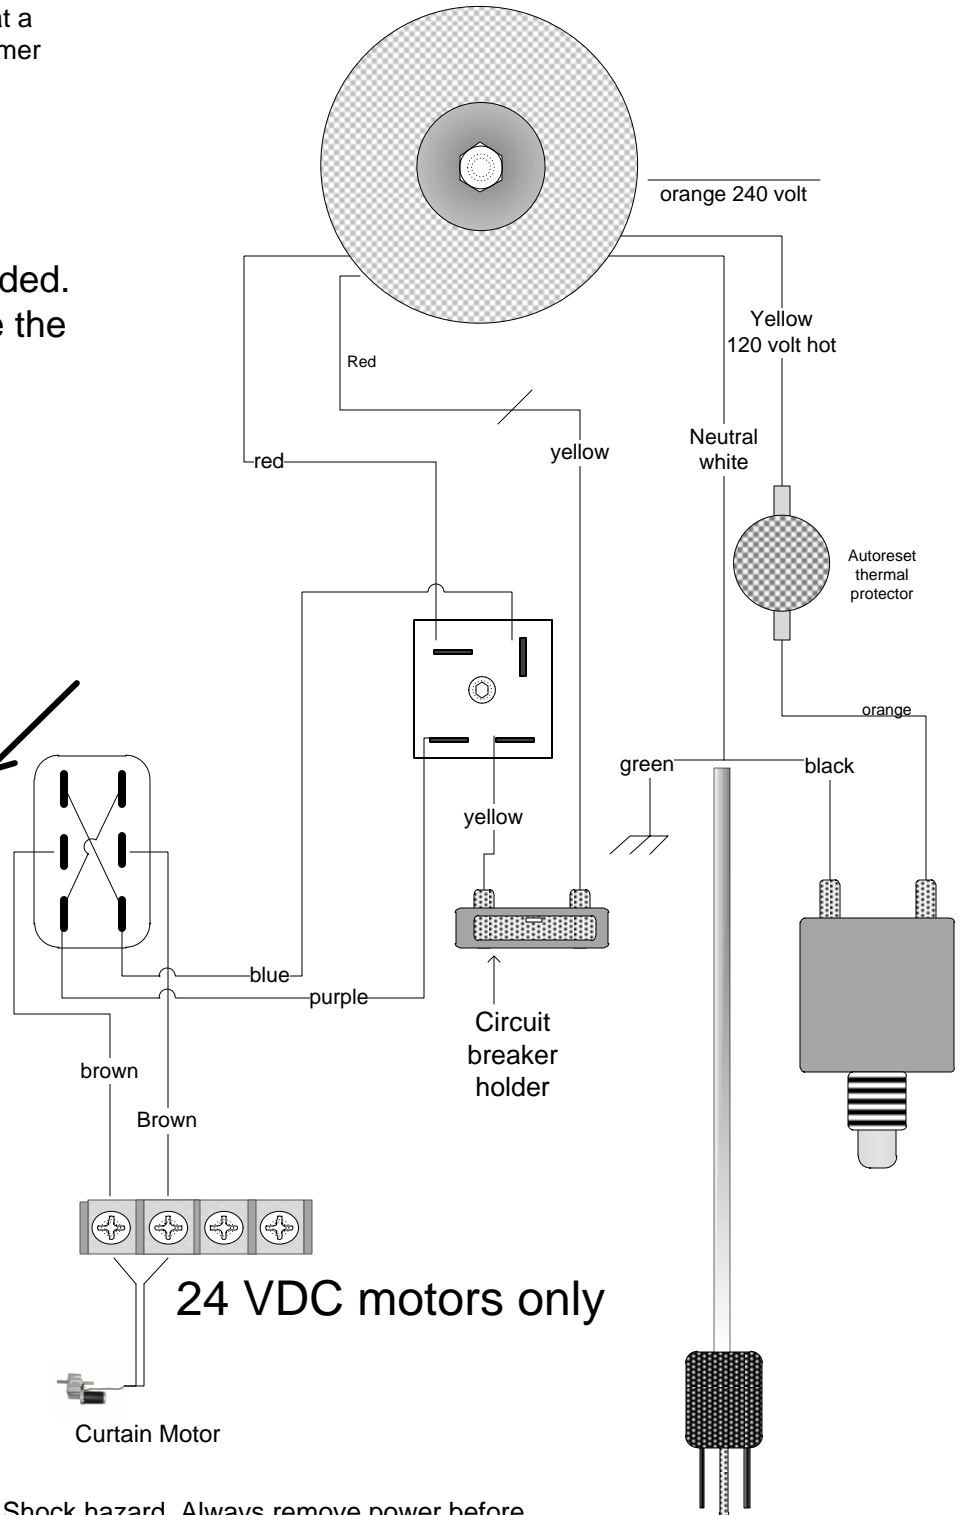

This unit is designed to run only 1 curtain at a time for the best performance. The transformer is rated for 300 watts 35% duty cycle.

Keep motor wire shorter than 200 feet.

There are 3 circuit breakers included. For the best fabric protection use the smallest possible breaker.

Outside, on the bottom, are 2 more circuit breakers. If either of these trip, no motors will run. If tripped, reset by pressing the operator in.

Shock hazard. Always remove power before opening box.
