

## Introducing the Improved 42-CB2 Controller Interface Box

Dear Valued Customer,

We are thrilled to announce the consolidation of our 42-CB2 and 42-CB4 Controller Interface Boxes into a single, enhanced 42-CB2 model. This update simplifies our product line, reduces costs, and provides greater versatility to meet your operational needs.

### Why the Consolidation?

By combining the capabilities of the 42-CB2 and 42-CB4, we've created a more powerful and flexible unit while keeping costs at the level of the original 42-CB2. This change allows us to:

- Streamline inventory and reduce item codes for easier ordering and support.
- Leverage increased purchasing power to lower production costs, passing savings on to you.
- Offer a single, robust solution that meets a wider range of operational requirements.

### Features of the Improved 42-CB2

The updated 42-CB2 Controller Interface Box is equipped with **two double-pole, single-throw contactors**, offering enhanced performance and flexibility:

- **Versatile Voltage Support:** Operates up to four (4) 120-volt or two (2) 240-volt, 1 HP AC motors, accommodating both 110-volt and 220-volt assets.
- **High Capacity:** Each contactor supports up to 20 amps inductive load per pole, allowing parallel operation of assets for increased efficiency.
- **Flexible Control Options:** Run each contactor independently with separate setpoints or configure setpoints to operate in parallel for synchronized control.
- **Reliable Design:** Built with durable double-pole, single-throw contactors for consistent performance in demanding applications.

### Benefits for You

- **Cost Savings:** Enjoy the advanced capabilities of the combined unit at the price point of the original 42-CB2.
- **Simplified Support:** A single model reduces complexity for ordering, installation, and customer support.
- **Enhanced Performance:** The improved 42-CB2 delivers the power and flexibility of the former CB4 with the compact design of the CB2.

### Transition Details

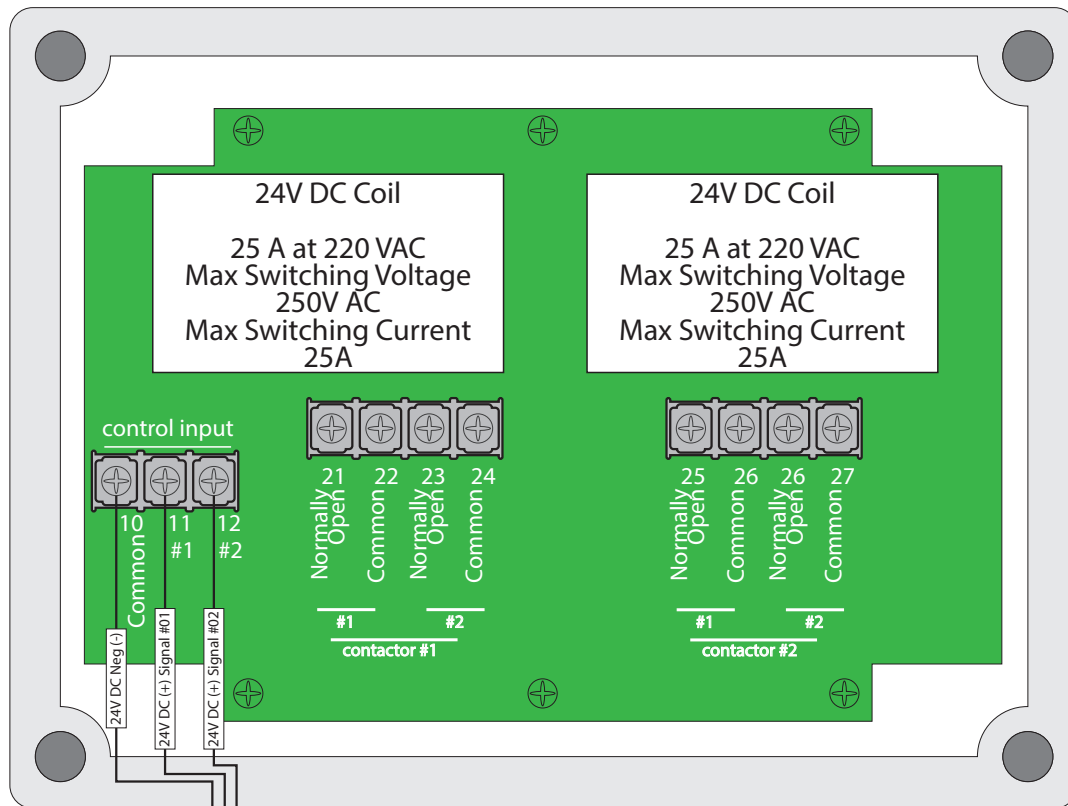

The improved 42-CB2 replaces both the 42-CB2 and 42-CB4 models, effective immediately. Our customer support team is ready to assist with any questions about compatibility, installation, or specifications.

Thank you for your continued trust in our products. We're confident the improved 42-CB2 will exceed your expectations with its enhanced capabilities and value.

Sincerely,  
The Team at Advancing Alternatives
